VEREENIGING WATER WISE EDUCATION CENTRE FET Phase Programmes

Rand Water's Water Wise Education Team (WWET) offers an education service to schools to assist them with a variety of Water Wise programmes that are aligned to the school curriculum. The WWETs, based in Vereeniging, offer the following FET Phase programmes at schools. During the programmes all learners, teachers and facilitators must wear a face mask and adhere to all health protocols and social distancing measures.

Water Quality Testing

If your school has a water source nearby, you can invite the team to do water quality testing with your learners. Water quality testing equipment will be provided by Rand Water. MiniSASS: includes catching and identification of water life to assess the health of a river. Water Quality Testing: includes the testing of pH, turbidity, coliform bacteria, dissolved oxygen, temperature, nitrates and phosphates.

Water in Our World

A 1.5 hour programme that includes a presentation and quiz that covers water as a natural resource; its importance in social and economic development; the challenges to water supply; and how water can be conserved.

The following content will be covered: the state of river catchments in South Africa; the quality of river water; how is tap water cleaned; how is clean water distributed; and an analysis of water consumption.

Human Impact on the Environment

The programme includes a presentation on the causes and consequences of human impact on the atmosphere and climate change; water availability and its quality; food security; loss of biodiversity; and solid waste disposal.

To make booking for the Water Wise Education Team please contact Nyree Steenekamp.
